

ANCO CASING PACK

Solutions Through Technology.....

Environmentally Friendly Chemicals

Product Description

ANCO CASING PACK is a multipurpose liquid packer fluid, designed specifically for fresh water and brines. ANCO CASING PACK contains a corrosion inhibitor, an oxygen scavenger, and a biocide.

Typical Application

ANCO CASING PACK may be applied in fresh water as well as brines. It has a mixed ionic charge, therefore close attention should be paid to compatibility with other fluids.

Product Advantages

- ANCO CASING PACK is very effective at low concentrations, making it extremely cost effective.
- ANCO CASING PACK is non-foaming and will not adversely effect drilling fluid properties.

Recommended Treatment

ANCO CASING PACK should be blended directly into the packed fluid at concentrations of 10 to 15 gallons per 100 bbls.

Handling

Observe warning labels on containers. Normal precautions for handling industrial chemicals should be observed. Wear protective goggles or face shield and rubber gloves.

Storage

Store in sealed upright containers in a ventilated area at ambient temperatures.

Packaging

Packaged in 55 gallon drums.

Typical Chemical and Physical Properties

Specific Gravity 60°F	1.13
Flash Point °F SFCC	200°F
Pour Point °F	10°F
Solubility in water	Soluble
Solubility in brine	Soluble
Solubility in hydrocarbons	Insoluble
pH	7 - 8
