

ANCO SHALE TREAT

Solutions Through Technology.....

Environmentally Friendly Chemicals

Product Description

ANCO SHALE TREAT is a specially formulated liquid cationic shale inhibitor.

Typical Application

ANCO SHALE TREAT is a very effective shale inhibitor without effecting drilling fluid properties.

Product Advantages

- ANCO SHALE TREAT is very effective at low concentrations.
- Very cost effective due to low concentration required.
- High flash point.

Recommended Treatment

5 - 10 gallons per 100 barrels of fluid as initial treatment. Additional treatment may be required depending on properties of shale being delivered.

Handling

Employees should utilize normal precautions when handling chemical products. The use of a dust mask, safety goggles and gloves are recommended when handling this product. In case of eye contact flush with clean fresh water to remove any particles. If irritation develops and persists, seek medical advice. Review the Material Safety Data Sheet (MSDS) for this product prior to use.

Storage

Store in sealed upright containers in a well ventilated area at ambient temperature.

Packaging

Packaged in 55 gallon drums.

Typical Chemical and Physical Properties

Specific gravity g/cm ³	1.00
Solubility with water and brine	Soluble
Appearance	Yellow Green Liquid
pH	8 - 9
Flash Point	> 200°F
Charge	Cationic
